Metodologia

Tutte le rielaborazioni grafiche di questo report hanno la seguente fonte dati:

- Database Farmavision Flusso Regionale File F ricevuto da LISPA normalizzando i consumi alle unità di confezioni dispensate.
- I dati nazionali derivano dal "**Report monitoraggio biosimilari Dato NSIS/Tracciabilità aggiornato a dicembre 2019 - Elaborazione Ufficio MSF del 28APR20 pubblicato sul sito AIFA**".
- I dati sono presentati sia complessivamente come consumo Regionale sia in forma aggregata sia per singola ATC monitorata.
- I consumi sono rappresentati delle Confezioni dispensate.
- Per le ATC L01XC02 Rituximab e L01XC03 Trastuzumab le Molecole Originator SC riportano solo il trend dei consumi senza alcun tipo di confronto poiché non è presente alcun Biosimilare.
